### Description.

Vervoids are a manufactured alien race, the result of experiments by 'mad' Professor Lasky. The Vervoids are an organic plant based life form covered in leaves and vines, with a head like the bud of a flower. They do however walk on two legs, and have two arms with which they are as dextrous as humans.

Vervoids have found their way to many corners of the universe since the first one accidentally hatched from their 'pods'. Wherever they are found they possess the same hatred of all other beings which inevitably leads them into conflict.

Vervoids have two forms of attack at their disposal: - Poison Thorn or Poison Gas, both are deadly at short range, with the poison 'methane' gas particularly effective against enemy groups.

## ORGANISATION AND COMMAND

Vervoids have no leaders, when in combat they operate with only one purpose, attack the enemy head on, and destroy them
